- Solidifies spills on contact
- Absorbed spill can be easily removed
- Use on hard and fabric surfaces
- Reduces cross-contamination
- Protects those most at risk
- Easy and safe to use
- Natural absorbent

Complete and ready to respond

SpillFix BIO-WASTE Infectious Waste Spill Kits are a convenient and safe method for cleaning up hazardous human and animal spills. Kits contain Bio-Waste absorbent, personal protection and waste disposal items for complete spill response compliancy.

Avoid potential contamination

Blood and bodily waste spills are potentially highly infectious and require prompt and immediate response to immobilise and contain. Bio-Waste Absorbent reduces the risk of potential cross-contamination to other people and responders.

Safe to use

Its unique wicking and immobilising characteristic of the natural material makes an awkward cleaning job simple and safe. SpillFix BIO-WASTE is harmless when used as directed and is non-toxic and non-hazardous to humans and animals.

"Conforms to NSW Health, Infection Control Policy—Blood and Body Substances Spills"
