

Safe Care Clean

Serious cleaning without the serious side effects

Stop commercial cleaning products wiping out your health

Currently there's no law requiring commercial cleaning products to fully list their ingredients. The reality is that many common products contain industrial chemicals and can be a real danger for everyone - especially pregnant women, infants and children. They can destroy our immune system, cause cancer, exacerbate asthma & lung disease, create learning disabilities and pollute the air and our environment.

An alternative is now available. Safe Care Commercial is a powerful, premium quality cleaning range that's safe for families, pets, our environment and ecology. Safe Care Commercial cleaners are the highest quality products at a competitive price, while strictly avoiding the use of any toxic or hazardous chemistry.

Use revolutionary biotechnology, not reactive chemicals

Our range features non-ionic surfactants that create unique hydrocarbon release agents giving a very powerful cleaning action. Soils are repelled from the cleaning surface without reacting with the surface. This non-reactive cleaning technology means no carcinogens or other pollutants are released, yet the results are stunningly effective, every time. The plant-based key ingredient in Safe Care Commercial products is recommended by The United States Environmental Protection Agency (EPA) to clean up major oil spills without harming the environment.

Breathe easy: safe for us and our kids

Safe Care Commercial products are 100% bio-based, non-toxic cleaners derived wholly from plant-based, renewable resources. They feature zero chemicals, no hazardous residues and can be used to clean surfaces children may come into contact with. Their non-toxic, fragrance free formulations reduce the exposure risk to children with skin and respiratory sensitivity.

Safe Care Commercial products are:

- Non-toxic
- Non-reactive
- Non-carcinogenic
- Safe to use, store and dispose of
- They contain a plant based active ingredient so powerful that the United States Environmental Protection Agency (EPA) recommends it to clean up oil spills without harming the environment

A full range of powerful commercial cleaners:

SC-1000 Aqueous Industrial cleaner concentrate

SC-1000 is a highly concentrated non-ionic aqueous cleaner degreaser concentrate comprised of a plant-based surfactant system. It's ideal for use in the most difficult cleaning situations for the removal of all hydrocarbon soils (petroleum derivatives, fats, oils, greases, lipids, proteins and sugars). SC-1000 will not react with other chemicals to create hazardous conditions.
